**ISACA®**  
Trust in, and value from, information systems

# Defend, protect, future-proof...

With information now one of the most valuable assets of any enterprise, managing IT risk is critical to keeping a business running and future-proofing it for long-term growth. That's why ISACA, a recognized global leader in governance, risk and compliance, introduced its Certified in Risk and Information Systems Control™ (CRISC™) certification in 2010.

## Stand Out Among Your Peers...

CRISC is the most current and rigorous designation that conveys a professional's IT-related risk management proficiency. Based on the results of extensive research, feedback and validation from subject matter experts around the world, it reflects real-world job experience from risk and control professionals. The CRISC designation conveys proficiency in the field and a commitment to the profession.

### Why CRISC is Right for You

- CRISC is recognized by itSMF for credits at the professional level for its new Prism certification program.
- CRISC is one of the top 10 highest-paying certifications according to the Foote Partners' 2012 *IT Skills and Certifications Pay Index*.
- The State of West Virginia (USA) Office of Information Security and Controls is using the five CRISC domains and task statements to develop a checklist for use in risk assessments for HIPAA compliance.

## ...and Protect Your Enterprise

ISACA's CRISC certification links IT risk and control, by addressing the management of IT-related business risk as an end-to-end process. Professionals who obtain the CRISC certification have the knowledge and ability to become strategic partners within their organizations.

*The CRISC was a forward-thinking certification when it was first introduced and it is no less so today as anticipating, evaluating, and responding to multiple risk vectors has been stitched into the fabric of every enterprise. It's a certification that should be part of the foundation of a company's or government organization's commitment to understanding risk principles and frameworks.*

—David Foote, CEO  
and Chief Research  
Officer, Foote Partners

# ...be a hero.

# CRISC for now and the future.

If you are an IT, risk, control or compliance professional, business analyst or project manager, CRISC certification can help position you better for career growth **and** protect your enterprise. Join more than 16,000 professionals committed to advancing their profession to higher levels.

See the credibility, recognition and rewards that come with a proven ability to manage enterprise risk through effective IS controls. As a CRISC you will gain:

- A prestigious symbol of knowledge and expertise as a risk professional
- A competitive advantage over peers
- Higher career growth potential
- Access to an elite peer network
- The ability to leverage the tools and resources of a global community of industry experts

*(save US \$50 with early registration)*

**Final registration deadline:** 3 October 2012

## Need help preparing?

### ISACA has you covered.

Our certification surveys show that ISACA exam preparation materials are the preferred source by exam takers.

- Download our Candidate's Guide for taking the exam at [www.isaca.org/guide](http://www.isaca.org/guide).
- Choose from several CRISC study guides and materials at [www.isaca.org/study](http://www.isaca.org/study).
- Register for one of ISACA's review courses or our new CRISC Online Review Course (coming in **September**) at [www.isaca.org/review](http://www.isaca.org/review).

“

*If you have real-world IT controls and risk experience, I strongly encourage you to pursue the CRISC certification. Becoming CRISC-certified provides an additional level of assurance that you have the necessary skills and experience to get the job done. It also enters you into a group of professionals with common interests and abilities. Networking with my fellow CRISCs and ISACA members has been an extremely rewarding experience. I encourage you to take advantage of the opportunities certification provides.*
