ISACA[®]

CERTIFY FOR THE REAL-WORLD JOB OF AN EXPERT IN THE GOVERNANCE OF ENTERPRISE IT AND MORE.

Since it was introduced in 2007, 8,000+ professionals have obtained ISACA®'s Certified in the Governance of Enterprise IT® (CGEIT®) certification to validate that they have the experience, knowledge and credibility to implement and manage effective governance of all areas of technology, as well as align IT with strategic enterprise goals.

The first step to becoming CGEIT certified is to take and pass the CGEIT certification exam, consisting of 150 questions covering 5 job practice domains.

1 FRAMEWORK FOR THE GOVERNANCE OF ENTERPRISE IT—Demonstrates that you have the expertise to define, establish and manage a framework for the governance of enterprise IT in alignment with the mission, vision and values of the enterprise.

Domain 1 authenticates the ability to facilitate the achievement of enterprise goals and objectives in order to create stakeholder value while optimizing resources.

2 STRATEGIC MANAGEMENT— Attests your acumen and ability to ensure that IT enables and supports the achievement of enterprise objectives by integrating and aligning IT strategic plans with those of the enterprise.

Domain 2 affirms your aptitude for seeing that appropriate policies and procedures are in place to support IT and enterprise strategic alignment.

3 BENEFITS REALIZATION—Proficiency in this job practice area verifies the agility necessary to ensure that IT-enabled investments are managed to deliver optimized business benefits, and that performance improvements are properly measured, evaluated and reported.

Domain 3 firmly establishes the expertise to see that IT-enabled investments are managed as a portfolio of investments through their economic life cycle to achieve business benefit.

4 RISK OPTIMIZATION—Confirms your ability to ensure an IT risk management framework exists to identify, analyze, mitigate, manage, monitor, and communicate IT-related business risk, and is aligned with the enterprise risk management (ERM) framework.

Domain 4 is also vital toward ensuring legal and regulatory compliance requirements are addressed through IT risk management.

5 RESOURCE OPTIMIZATION—Aptitude in this key realm speaks to your savvy in ensuring the optimization of IT resources including information, services, infrastructure, applications and people to support the achievement of enterprise objectives.

Domain 5 establishes that you know how to put processes in place to identify, acquire and maintain IT resources and capabilities (i.e., information, services, infrastructure, applications and people).

SEE WHY CGEIT IS A LIFELONG SYMBOL OF KNOWLEDGE AND EXPERTISE.

As technological advancements and IT best-practices intertwine with overall business objectives, successful enterprises demand optimal governance to ensure IT projects, assets and processes are seamlessly aligned with overall goals and key business decisions.

As the first and only designation to recognize skilled IT governance professionals, ISACA's Certified in the Governance of Enterprise IT® (CGEIT®) certification can instantly pronounce your professional expertise while enhancing your marketability in—and beyond—the realm of IT governance.

- The American National Standards Institute (ANSI) has accredited the CGEIT certification program under ISO/IEC 17024:2012.
- *CIO Magazine* named CGEIT one of The top 6 governance, risk and compliance (GRC) certifications in 2017.
- CGEIT ranks among the top 3 highest-compensated certifications worldwide on *Certification Magazine's* Salary Survey 2018, with an average global salary of US\$127,020.
