Types of Exam Questions

Exam questions are developed with the intent of measuring and testing practical knowledge and the application of best practice concepts and standards. All questions are designed with one best answer.

- Every question has a stem (question) and four options (answer choices).
- Choose the correct or best answer from the options.
- The stem may be in the form of a question or incomplete statement.
- In some instances, a scenario may also be included. These questions normally include a description of a situation and require you to answer two or more questions based on the information provided.

Continued on the next page
Getting Ready for the Exam, Continued

**Taking the Exam Tips**

- Read each question carefully. An exam question may require you to choose the appropriate answer based on a qualifier, such as MOST likely or BEST.
- Read the question carefully, eliminate known incorrect answers and then make the best choice possible.
- A tutorial of the exam taking experience will be provided after logging onto the testing station and prior to the start of the exam. Pay close attention to the tutorial so as not to miss important information.
- All questions should be answered.
- There are no penalties for incorrect answers. Grades are based solely on the total number of questions answered correctly, so do not leave any questions blank.
- Budget your time. The exam is four hours in length. Pace yourself to complete the entire exam.

Exam Scoring

Candidate scores are reported as a scaled score. A scaled score is a conversion of a candidate’s raw score on an exam to a common scale. ISACA uses and reports scores on a common scale from 200 to 800. Review the points below to identify the lowest, passing and perfect scores.

- A score of 800 represents a perfect score with all questions answered correctly.
- A score of 200 represents the lowest score possible and signifies only a small number of questions were answered correctly.
- You must receive a score of 450 or higher to pass the exam which represents the minimum standard of knowledge.

A candidate receiving a passing score may then apply for certification if all other requirements are met.

Requests for Rescoring

While we are confident in the integrity and validity of our scoring procedures, you may request a rescore if you do not pass the exam. Rescores are performed by PSI.

You must submit a rescore request in writing through our support page within 30 days following the release of the exam results.

- Requests for a rescore after 30 days will not be processed.
- All requests must include a candidate’s name, ISACA identification number and mailing address.
- A fee of US $75 must accompany each request.
