CREATE BETTER TRAINED EMPLOYEES.

CHOOSE THE BEST VALUE IN TRAINING.

ISACA ON-SITE TRAINING DELIVERS EXPERT INSTRUCTION AT YOUR WORKPLACE.

MORE PRODUCTIVE
TRAIN YOUR WORKFORCE ON-SITE.

SAVE ON EMPLOYEE DOWNTIME AND TRAVEL.

Add to the value of your employees and enhance your enterprise’s edge in today’s increasingly competitive market! ISACA® On-Site Training brings expert instruction, real-world experience and customizable course content to your workforce at your workplace—or a convenient location you choose.

ISACA On-Site Training enables you to:

> Develop the skills of your employees in focus disciplines that include Cybersecurity Fundamentals, Audit/Assurance, Risk, Security, Governance and COBIT®

> Customize course length and content to your enterprise’s specific requirements

> Build the skills of your team in one or more sessions for one fixed price—with less employee downtime and less hotel and travel expense

> Realize immediate ROI from training by providing employees with skills that can be applied right away to add value and reduce risk in your enterprise

Customizable On-Site Training courses enable your people to meet real-world challenges and add value to your enterprise.

Taught by trusted industry experts, ISACA On-Site Training courses range from fundamental to deep dives into the focus areas. Course length and content can be customized for your specific needs to maximize the value to your enterprise.

For course outlines, to learn more about customization and for more information, visit www.isaca.org/onsite.

BETTER PROTECT YOUR ENTERPRISE NOW AND INTO THE FUTURE

Train your employees in the essential concepts of cybersecurity with ISACA’s new Cybersecurity course offerings.

Cybersecurity is a growing and rapidly changing field, and it is crucial that the central concepts that frame and define this increasingly pervasive field are understood by professionals who are involved and concerned with the security implications of Information Systems and Information Technology. ISACA’s Cybersecurity courses are designed for this purpose, as well as to provide insight into the importance of cybersecurity, and the integral role of cybersecurity professionals.

COBIT 5 CERTIFIED ASSESSOR PROGRAM

Unique Skills—invaluable to your enterprise

> **Enhance your strategic assets.** Open your enterprise to greater opportunity. With IT leaders within your enterprise who can plan and communicate change and improvement initiatives, you can more easily gain C-level and board member buy-in.

> **Set your enterprise up for future success.** COBIT 5 Certified Assessors are highly competent IT and business professionals trained and experienced in planning, building, and running IT processes and providing reliable, consistent and repeatable enterprisewide assessments of IT process capabilities.

### THE COBIT 5 CERTIFIED ASSESSOR PATHWAY

Your IT/IS Business Managers, Auditors, Information Security and IT Practitioners or Governance professionals can become COBIT 5 Certified Assessors by successfully completing the pathway:

1. **COBIT 5 Foundation Exam**
2. **COBIT 5 Assessor Course**
3. **COBIT 5 Assessor for Security Course**
4. **COBIT 5 Assessor Exam**
5. **COBIT 5 Assessor Certification**

The COBIT 5 Assessor Exam can be taken after completion of either the COBIT 5 Assessor course or the COBIT 5 Assessor for Security course. With a passing score, prerequisites met and required work experience, your employee can apply to become a COBIT Certified Assessor.
