Insider Threats in a World of Externalities by Dr. Jay Kennedy

Insiders have legitimate access to knowledge/information to complete their business tasks. However, this access can easily be turned into a veil that uses legitimate tasks and activities to mask illicit behaviors. This session will focus on behavioral and organizational risk mitigation strategies that can be implemented, or championed, by IT security professionals. As such, the goals of my presentation are to:

1) Elucidate the scope and scale of insider threats;
2) Identify processes and procedures designed to mitigate those threats; and
3) Discuss the behavioral implications of technology-based crime prevention techniques.

Not So Simple Incident Response—Why Technical Support can be the Best Friend or the Worst Enemy of Incident Response by Josh Gembala

Not so long ago, a dedicated IT department responsible for all the company's technology was common. Those days are gone now, and even small businesses have found themselves having to reorganize their teams based on functional roles and specializations. Whether utilizing internal resources, managed services, contractors, or Fiverr, we have become an often-disconnected collection of groups with different and sometimes conflicting goals. Even organizations with an internal incident response (CIRT) can find themselves at odds with other teams. Everyone in an organization plays a role in incident response, and it's your job to make them aware of their role, responsibilities, and ensure they have the training and tools to perform it.

WMISACA Scholarship Winners!

**Congratulations to the Western Michigan ISACA
2018 Scholarship winners!**

We had several great applicants this year. Each of them submitted an application, their transcript, and wrote an essay on one of two topics:

- Discuss and analyze what you see as potential pitfalls associated with auditing cybersecurity programs.
- Discuss and analyze what you see as potential pitfalls associated with creating and implementing a cybersecurity program.

Justin Fowler placed first and has been awarded a $1,500 scholarship and **Lucas Branganca** placed second and has been awarded a $1,000 scholarship.

WMISACA Board Report

Our 8th annual joint 1-day seminar with the Lansing IIA was successful. I wish to thank everyone who contributed to making this event a success. We have one last event schedule (our Annual General Meeting) and that is scheduled June 21st . I hope several of you will be in attendance.

Looking back through this year, I would like to thank all the organizations that hosted us: MSU Federal Credit Union, Mercantile Bank, Chemical Bank & Trust, Farm Bureau Insurance, and Jackson National Life Insurance. Through the efforts of these organizations, we were able to keep our education programs at a lower cost to the membership.

I would also like to thank the directors who are not continuing in their directorship capacity. These individuals are: Derrick Kooistra, Josh Wallner, Bob Kern, and Tim Kubu. Only through volunteers are we able to continue to provide membership service you expect.

Highlights from this last year:
- 3 seminars (3-Day SAP Seminar, 2-Day Agile and Scrum Development Lifecycle, and 1-Day 8th Annual WMISACA/Lansing IIA Seminar).
- 5 breakfast meetings
- 48 total CPEs opportunities

I also wish to thank everyone who made my tenure as Chapter President a success. I appreciated your faith and belief in leading the Chapter successfully.

Regards,

President Brent Moeggenborg

Help Shape the Direction of WMISACA

Want to **help shape the direction of WMISACA**? WMISACA is looking for members to volunteer for one of the WMISACA committees. The **committees play an important role** in helping provide value to WMISACA members. Benefits of Committee membership include:

- Your chance to help shape the activities and direction of WMISACA
- Free attendance to monthly member meetings
- CPE for attendance at committee member meetings

We would like to have volunteers for the following committees:

♦ Events Committee - The Event Committee a critical component of the West Michigan ISACA Chapter. The committee is responsible for planning all of the membership meetings and seminars. As part of this planning process the committee determines topics, selects speakers, finds venues, arranges for food, advertises the events and manages the registration and collection of fees. Committee members arrive early and stay after each event to welcome and register attendees, guests and speakers, and makes sure we leave the room looking great when we leave. Without the dedication of the members of the event committee, the chapter could not provide the low cost CPEs that are important to the membership. This is a great way to learn how the chapter functions, get to know many of the board members, and influence the type of training offered. If you are interested in joining the Event Committee, please contact Mark Pardee at vice.president@wmisaca.org

♦ Social Events Committee - this committee aims to promote the Chapter and the profession by connecting members and professionals through social networking events that bring people together. Reach out to Jason Sist jason.sist@gfs.com if interested.

♦ Newsletter Committee - this committee provides input on the "look", content, and direction of the newsletter. Time commitment is minimal. Active participation helping to identify topics and provide content for inclusion in the newsletter are what is needed! An interesting and informative newsletter is what WMISACA wants to provide, and this is your opportunity to help. Reach out to Patricia Chooi (chooip@michigan.gov or communications@wmisaca.org) if interested.

♦ Website Committee - this committee is responsible for planning and designing the Western Michigan ISACA website and new mobile app for a positive user experience. To make the website and app successful, it is necessary to have an active voice from general members. Time commitment is minimal; no technical website/app development skills necessary (leave that to the experts). Reach out to Evan Malowinski (evan.malowinski@chemicalbank.com) to make a difference.

If you are **interested in helping shape the direction of WMISACA and volunteering for a Committee**, please contact one of the WMISACA Board members.

Trust in, and value from, information systems

Upcoming ISACA Webinar

Leveraging DNS, DHCP and IPAM for Threat Containment and Operations

Date: Tuesday, 19 June 2018
Time: 12PM (EDT) - 60 minutes

CPE: 1 (members only) - **Register Now!**

Context is king. Today's cybersecurity professionals are overburdened with thousands of alerts and struggle with siloed security tools that rarely share information. So, getting context on threats and knowing which ones to address first is a constant challenge. DNS, DHCP and IPAM, core network services that all organizations need to function, can provide that context and act as a control point for malware detection and threat hunting. Join this webinar to learn how these core network services:

- Provide rich network data, device inventory info and an audit trail of activity for event correlation
- Make it easier to identify compromised devices
- Unlock data needed for effective threat investigation.

Presenter: Srikrupa Srivatsan, *Senior Product Marketing Manager—Infoblox*

Srikrupa has 19 years of experience in technology in various roles including software development, product management and product marketing. Currently, she is responsible for messaging, positioning and bringing to market Infoblox's security solutions that ease security operations and provide DNS based security. She has an MBA from University of California, Haas School of Business and a Computer Science Engineering degree.

ISACA Journal Subscription

Remember 'Opt-In' by 26 June to receive the "Journal—ISACA". Subscription changes require members must now to opt-in to receive print copies of the ISACA Journal. Members can opt-in by following these steps:

1) Login to www.isaca.org/myisaca,

2) Click the "myProfile" tab and select the "Account-Address-Demographic" tab,

3) Scroll to the bottom, click "Edit," then select the "My Demographic and Other Information" tab,

4) In the "ISACA Journal Delivery Options—Print and/or Digital" section, tick the box to opt-in.

5) Click the "Save" button.
