Venue: Commonwealth Bank Australia - 1 Harbour Street, Sydney

WHAT TO EXPECT:

- Improve your ability to implement an IT risk management framework.
- Increase the likelihood of passing and getting the highest scores for ISACA’s ‘CRISC’ Certification.
- Enhance your career by understanding how to implement ISACA’s Risk-IT framework and use the same material to prepare for our CRISC certification exam.
- Provide you the credibility to discuss critical issues around managing enterprise IT risks & controls.
- Information covered will include:
  - Risk identification, assessment & evaluation
  - Risk response
  - Risk monitoring
  - IS control design & implementation
  - IS control monitoring & maintenance
  - Practice exam questions and discussion

WHY YOU SHOULD ATTEND:

- Exam preparation
- Prove your worth through certification
- Practical application of the courseware
- Industry lead discussion with examples
- Achieve your potential through networking and good practices within industry
- Highlight gaps in your knowledge
THE PRESENTER

Ken Doughty has developed and delivered advanced risk management methodologies at a leading financial services organisation. He has over 30 years’ experience in senior IT Audit, Project Management, Business Continuity, Information Technology and Risk Management roles in the public and private sectors.

Ken has had a large number of papers and a book published in the USA, which includes, IT Audit, Business Continuity, Security, IT Service Management, Risk Management, etc. He has also received numerous awards including ISACA’s Harold Weiss Award for Contribution to Information Systems Auditing and Security Education. He also lectures part-time at Macquarie University and has provided very entertaining and informative presentations for our local chapter.
