## President's Message

Dear Chapter Members,

Greetings fellow chapter members. I hope you all enjoyed the interface conference and the various interesting topics. This would be the last chapter meeting before we break for the summer. It would also be the Annual General Body meeting where we announce the board for the next year. I take this opportunity to thank all my colleagues in the board and the members for affording me the opportunity to serve as your president for the past two years. Even though it was very involved, it was a rewarding and interesting experience.

As you would have heard several times, the nomination committee which is in the process of finalizing the board for the next year and due to overwhelming support, there would be elections to choose the president and vice president slot. You should have already received the email for the online ballot. If you have not yet done so, please go ahead and cast your ballot and thank you for those of you who have already exercised their ballot.

As is the custom, this last event would be held at Dave & Buster's affording an opportunity to network and have some fun in the process. See you all at the event.

As always please let us know if you are interested to volunteer or have any topics or other training suggestion. We are desperately looking for volunteers. Please feel free to contact us at [isacacentralok@gmail.com](mailto:isacacentralok@gmail.com) with any suggestions.

Jay Thirumalai

President, ISACA Central Oklahoma Chapter

## Alan White's BIO

Alan White is a technology visionary, strategist, innovator and solutions expert with over 20 years' experience in IT. He is a graduate of Queen's University of Belfast, Ireland. Alan has worked in both SMB companies as well as multi-national corporations in varying leadership and technology roles.

Today Alan is the cloud strategy principal for Tierpoint based in Oklahoma City, OK, aligning "as-a-service" technologies to business goals. Tierpoint is one of the nation's leading cloud providers offering multi-tenant, private and hybrid options.

Alan is a 2 time cancer survivor, competitive cyclist and currently resides in Edmond, Oklahoma with his wife, 3 children and 3 dogs

## Topic Synopsis

The benefits of cloud are extensive. Cloud enables rapid deployment, provisioning and scaling of IT resources, which means users can integrate acquired companies more easily and enter new markets more quickly — all while shortening development times, reducing waste and lowering costs.

But despite growing cloud adoption rates, some companies are still reluctant to aggressively move workloads and applications to the cloud. The reason is security. Security remains one of the major concerns both when moving applications to the cloud and selecting the right cloud provider. It's time to separate fact from fiction and debunk some cloud security myths regarding Infrastructure as a Service (IaaS) — the building block for all other cloud services.
