

ABOUT ISACA

ISACA got its start in 1967, when a small group of individuals with similar jobs-auditing controls in the computer systems that were becoming increasingly critical to the operations of their organizations-sat down to discuss the need for a centralized source of information and guidance in the field. In 1969, the group formalized, incorporating as the EDP Auditors Association. In 1976 the association formed an education foundation to undertake large-scale research efforts to expand the knowledge and value of the IT governance and control field. Previously known as the Information Systems Audit and Control Association, ISACA now goes by its acronym only, to reflect the broad range of IT governance professionals it serves.

Today, ISACA's membership-more than 110,000 strong worldwide-is characterized by its diversity. Members live and work in more than 180 countries and cover a variety of professional IT-related positions-to name just a few, IS auditor, consultant, educator, IS security professional, regulator, chief information officer and internal auditor. Some are new to the field, others are at middle management levels and still others are in the most senior ranks. They work in nearly all industry categories, including financial and banking, public accounting, government and the public sector, utilities and manufacturing. This diversity enables members to learn from each other, and exchange widely divergent viewpoints on a variety of professional topics. It has long been considered one of ISACA's strengths.

ISACA Malaysia Chapter is the local chapter affiliate of ISACA. ISACA Malaysia (www.isaca.org/malaysia) was established in 1984, with current membership exceeding over 650 members and more than 450 professionals holding various ISACA certifications.

EVENING TALK CYBER SECURITY – SECURING YOUR ENVIRONMENT

2013 may be remembered as the “year of the retailer breach” but a comprehensive assessment suggests it was a year of transition from geopolitical attacks to large-scale attacks on payment card systems. -Verizon 2014 Data Breach Investigation Report

How would you prepare for it?

New, advanced threats are straining security team resources, even while spending increases. Can you make sense of the information you receive from the investments made? Find out more on how to protect your organization and business right now!

Join us for this evening talk with two seasoned Information Security experts in the IT Security industry!

SPEAKERS' PROFILE

Ted Egan (Vice President APAC)

Ted is VP APAC for Threatmetrix and Cybersecurity Entrepreneur (who loves working at the leading edge & developing security technology that makes a real difference). He has more than 20 years' experience in IT, Telecommunications and the Information Security sector; he is passionate about developing new technologies which make a real positive difference in the way we operate online and stop cybercrime. Ted has been involved in a number of security technology start-ups and public listing since 1990's. He cofounded TrustDefender in 2005 and led the company as CEO until 2011 where the company was acquired by ThreatMetrix Inc in 2011.
