

Corporate IT Governance & NIST Cybersecurity Framework with COBIT 5

Workshop Overview

ISACA Malaysia Chapter is putting together two related training into one workshop, both using COBIT 5 as the base - Corporate IT Governance and National Institute of Standards and Technology (NIST) Cybersecurity Framework. This two-days programme have been carefully crafted with the objective to build your knowledge and understanding in IT Governance and Cybersecurity Frameworks. Participants will be introduced to COBIT 5 overarching principles that will effectively guide enterprise in implementing and deriving optimum benefits via the application of globally accepted IT governance and cybersecurity standards.

Against the pressing need to arrest cybersecurity risks and attacks, participants has the opportunity to discover how the NIST framework is fitted and underpinned by the renowned COBIT 5 enterprise IT governance model. There will be interactive engagements, sharing and discussions using case studies built on real life experiences. This workshop is specifically designed and facilitated by corporate professionals with various types of hands-on field experiences.

What You Will Learn

- Understand what application control testing is and how it relates to Governance, Risk and Compliance
- Critical Areas of Enterprise IT Governance
- Introduction to NIST using COBIT 5
- Drivers for developing a Cybersecurity Framework using COBIT 5
- The 5 Key Principles and business benefits of using COBIT 5 for the Governance & Management of Enterprise IT
- Implementation of NIST using COBIT 5
