Welcome to the new @ISACA! We are excited to give readers more of what they have been asking for: more thought leadership, career guidance, practical tips and learning in addition to CPE opportunities. The newsletter also will feature key leadership updates from ISACA and will include additional multimedia content such as videos and podcasts, while adopting a more modern design.

These enhancements were driven by feedback from ISACA members about the content that is most valuable to them as they grow their careers in IT audit, governance, privacy, risk and security. New editions of @ISACA will be distributed each week, with the fourth edition of each month focusing exclusively on hot topics in information and cyber security.

### Podcast Guidelines

**Content/Organization**

ISACA podcasts are available to nonmembers and do not require an ISACA login to access. The ISACA Podcast is listened to by those familiar with ISACA and others not in the industry. Content needs to have in-depth information that keeps practitioners listening, but it also must be understandable for those not familiar with these concepts.

Podcasts are an Q&A style. They begin with a brief introduction of the topic and speaker(s), feature a few questions and end with an outro.

**Ads/Sponsorship**

Ads in podcasts will be placed in the middle of the podcast. The beginning and end of the podcast will mention the sponsor, e.g., “You’re listening to the ISACA Podcast. This episode is brought to you by our sponsor X.” The 60–90-second ad will appear in the middle of the podcast, introduced with something like, “Before we continue, it’s time for a quick word from our sponsor, X.” Copy should be provided to the podcast host, who will read the ad.

Sponsored podcasts must not be too promotional in nature. The speaker’s name and company can be included along with brief mentions of their organization, but the podcast must provide vendor-neutral thought leadership, practical tips or career guidance.

**Style/Tone**

As with ISACA’s written resources, the podcast has an international following, so speakers should speak slowly and avoid using words that may be unfamiliar to non-native English speakers. To help listeners in other countries feel less distance with ISACA Global, it is beneficial to select podcast participants from around the world, provided that their accents are easy to understand.

Avoid product placement or speaking negatively about any one product/organization. If, for example, a specific organization’s breach is being discussed, ensure that speakers are not excessively critical of that organization.

Providing questions to speakers ahead of time is permitted, but participants may not write out a script. Reading from a script will sound unnatural, and listeners are unlikely to listen to the entire podcast.

**Scheduling/Length**

ISACA Podcasts need to be scheduled three months in advance. They should be roughly 23 minutes (including intro and outro). Slightly under is fine.

Guidelines

Originality: The post must be original (not previously published elsewhere).

Length: We're flexible, but we ask that posts come in between 400 and 1,000 words.

Tone: While it is OK to link to a relevant resource, the tone of the post must be thought leadership and not read like a sales pitch. Blogs are informal, so please keep the post engaging, conversational and full of actionable takeaways.

Relevance: Keep in mind the ISACA audience of audit, governance, privacy, risk and security professionals is global and ranges from industry newcomers to C-suite executives. Please make your post relatable to a diverse audience of technology minded pros.

For electronic advertising that directs the user to a URL, the landing page must include a link to the advertiser’s privacy policy and the page must be secure (https://).

- Phishing. You may not use an ad to promote a website that tricks a user into providing personal or other information. ISACA requires that advertisers comply with all applicable laws, regulations, industry codes and this Policy and any other applicable ISACA guidelines. We recommend that you familiarize yourself with and keep up to date on these requirements for the places where your business operates. Privacy.
