WHAT DO YOU HOPE ISACA MEMBERS CAN BENEFIT FROM IN THE FUTURE?

During ISACA’s 50th anniversary year, members offer their thoughts on the future impact that the association will have on members.

“The future will be shaped by the technological transformation that we are witnessing today. Ours will be one of the few professions that is ready to adapt to the changes. Robotics, Internet of Things and artificial intelligence will come to the forefront in the coming years, and those who are with ISACA will be the ones who will ensure better governance and business benefits are derived from those changes and will be at a huge advantage over many others.”

Ing. Thierry MINKA, PhD candidate, CISA, CISM, CRISC, CSX-F
Chief Cybersecurity Officer, Supreme State Audit Office
Cameroon

“As more technology moves into the cloud, the IT auditor focus will shift from server configurations, application security and change management toward third-party reviews and service-level agreements, mobility and business support. ISACA is needed to support this expanded environment, as many companies will retain some onsite hardware and applications while moving to the cloud and expanding mobile connectivity.”

Richard Fowler, CISA, CRISC
Senior Audit Specialist
United States

“The future will be shaped by the technological transformation that we are witnessing today. Ours will be one of the few professions that is ready to adapt to the changes. Robotics, Internet of Things and artificial intelligence will come to the forefront in the coming years, and those who are with ISACA will be the ones who will ensure better governance and business benefits are derived from those changes and will be at a huge advantage over many others.”

Nalin Wijetilleke, MBA, FBCI, CISA, CGEIT, MInstD, Certified Data Protection Officer (GDPR)
Managing Director, ContinuityNZ
New Zealand

“With robotics, AI, and who knows what is next, the world is changing so fast. ISACA has been here for 50 years, so the next 50 will be even more exciting. We need an organization to spearhead innovation and help us continue to learn and grow. ISACA will do that for us.”

Rosemary M. Amato, CISA, CMA
Global Data Management, Head of Demand Management, ING Bank
The Netherlands
