BRING EXPERT TRAINING TO YOUR WORKPLACE.

ISACA®’s globally respected training and certification programs inspire confidence that enables innovation in the workplace. ISACA’s On-Site Training brings a unique mix of training tools and techniques that supports your organization’s specific needs and goals. Each program is designed to reduce downtime, build teamwork and expand awareness and expertise among stakeholders—at your enterprise or a convenient location you choose.
“ISACA TRAINING FOCUSES ON REAL-WORLD ISSUES. MANY SOLUTIONS CAN BE APPLIED DIRECTLY IN YOUR ENTERPRISE.”

— KETAN DHOLAKIA, CISM, CRISC
MANAGING PARTNER, MACLEAR

ISACA MEMBER SINCE 2007
YOUR BEST VALUE IN CUSTOM ON-SITE TRAINING.

Employees represent an organization’s most valuable, and often largest, investment. ISACA protects and grows that investment by examining current competencies and offering strategies to align with your organization’s goals. We leverage technology and individual learning styles to create innovative programs for recruitment, development and continued retention of highly skilled, motivated employees.

We work closely with you to understand your needs and develop training that supports your business goals. You will have access to dedicated account management and our highly regarded subject matter experts. Our trainers hold multiple industry certifications and bring real-world experiences as they deliver proven strategies, techniques and best practices.

You will benefit from:

> Flexible, convenient delivery options®
> Alignment with global frameworks in IT governance, cyber security and IT audit and assurance
> Follow-up materials and support that reinforce what was learned in training sessions

ISACA On-Site Training is customizable to your needs. This makes it ideal for enhancing the knowledge and skills of groups large and small—and for maintaining consistent protocols and skills levels across multiple enterprise locations.

Courses range from fundamental concepts to deep dives into critical focus areas. You choose the length, content, format and location to address the specific requirements of your enterprise.

CUTTING-EDGE CYBER SECURITY TRAINING

Ensuring that employees have appropriate levels of cyber security knowledge and expertise has become more critical than ever. Cyber security challenges evolve every day and affect nearly every area of your enterprise. You can count on ISACA to help employees and other stakeholders gain in-demand skills and practical knowledge.

ON-DEMAND, PERFORMANCE-BASED CYBER SECURITY TRAINING FOR YOUR ORGANIZATION

Cybersecurity Nexus™ (CSX) Enterprise Training Platform

Always on and continually updated, the CSX Enterprise Training Platform helps your employees build critical technical cyber security skills through hands-on, performance-based training. In addition, our skills assessment component enables you to verify the technical competency of both existing employees and prospective new hires.

**Hands-on, practical training in a live and dynamic network environment:** employees understand and apply cyber security solutions based on recent, real-world scenarios and are given live incidents to detect and mitigate.

**“Anytime, anywhere” training with minimal technical requirements:** your employees can access the CSX platform and train 24/7, anywhere a computer and high-speed internet connection are available. They can then learn at their own pace, focusing on areas where they need to build or improve individual skills.

**Cost-effective and flexible training:** you’ll have the ability to train all staff with a significant security role cost effectively, with no need for expensive travel or long periods of time away from work.

**Training content that stays current:** courses, labs, tools and scenarios are continuously updated, ensuring your staff are always on top of the latest known threats and approaches. To keep staff up to date, new labs are issued every quarter.

**Every experience is performance-based:** our training platform is the first to offer performance-based evaluation and scoring of every effort. Users are assessed in real time and receive their success metrics and continuing professional education credits at the end of each lab and course.

**Labs built with your needs in mind:** our labs are developed based on your input, allowing you to help build a better cyber security workforce for your enterprise.
