

The Cloud Computing Risk Intelligence Map™ provides a unique view on the pervasive, evolving, and interconnected nature of incremental risks associated with cloud computing that executives and managers may find useful in identifying risks that apply to their organizations.

Businesses thrive by taking risks, but falter when risk is managed ineffectively. A Risk Intelligent Enterprise™ recognizes this dual nature of risk and devotes sufficient resources both to risk taking for reward and to the protection of existing assets.

The Risk Intelligence Map is intended to serve as a guide on the journey toward Risk Intelligence by helping personnel in all functions of an organization broaden their perspective on risk and improve their ability to execute their risk-related responsibilities.

- This may be accomplished by using the Risk Intelligence Map to:
- spur discussions about risk management topics, including risk identification, prioritization, measurement, and mitigation
 - facilitate the connection of risk management silos
 - identify redundant efforts in place to manage risk
 - improve efficiency in compliance and risk management efforts
 - develop risk event scenarios that require integrated responses

The Risk Intelligence Map is not a definitive or comprehensive representation of risks that may be encountered by an organization. Consider customizing the Risk Intelligence Map based on risks that impact your organization. Areas could include regulatory, geographic, industry, and company-specific issues.

For more information on customizing the Risk Intelligence Map to meet the needs of your organization, please contact your Deloitte practitioner.
