

ISACA Student Group Logo Use Guidelines

The ISACA logo designed for approved ISACA student groups is made up of four elements: the star symbol, the name, the tagline and the student group title, as shown. This is the only authorized configuration of the required four elements. Never attempt to use the star symbol without the name, nor the name without the star symbol. The tagline must always accompany the star symbol and name. All applications of ISACA student group logos should utilize the files provided by International Headquarters. Do not attempt to re-create the files or alter the approved configuration of elements. To receive the file for the logo, send an e-mail to students@isaca.org.
