

COBIT Fact Sheet

[COBIT](#) is the leading framework for the enterprise governance of information and technology (EGIT). For 24 years, COBIT has helped enterprises optimize the value of their critical information assets. In the last nine years, COBIT publications have been downloaded more than one million times.

Now, COBIT 2019 helps enterprise leaders, managers and business technology professionals protect the integrity of their enterprise's information and deliver greater value to stakeholders through practical, customizable governance and management guidance.

COBIT 2019 is a comprehensive framework aligned with globally accepted practices, analytical tools and models that can help any enterprise effectively address business issues through governance and management of information and technology. It is the first update to COBIT since COBIT 5 was introduced in 2012. COBIT 2019 includes 40 governance and management objectives, as well as focus areas including information security, DevOps, cloud and more.

COBIT is issued by global association [ISACA](#). ISACA leverages the expertise of its more than 510,000 engaged professionals in information and cybersecurity, governance, assurance, risk and innovation, as well as its enterprise performance subsidiary, CMMI Institute, to help advance innovation through technology.

Benefits of Using COBIT 2019:

- Provides a systematic approach, common language and understanding for addressing today's most challenging aspects of meeting enterprise performance goals
- Clarifies goals for more effective decision-making
- Assists in addressing the needs of stakeholders across the enterprise
- Helps enterprises develop a customized governance solution

COBIT Materials:

These COBIT 2019 framework publications are available as complimentary downloads at www.isaca.org/cobit:
